EDUCATION

(2014 - 2018) TECHNICAL COLLEGE
OF LVIV POLYTECHNIC

- **Software Engineering**

(2018 - 2020) IVAN FRANKO
NATIONAL UNIVERSITY OF LVIV

- **Bachelor's degree of Computer Science**

(2020 - 2022) IVAN FRANKO
NATIONAL UNIVERSITY OF LVIV

- **Master's degree of Computer Science**

(2022 - 2026) IVAN FRANKO
NATIONAL UNIVERSITY OF LVIV

- **PhD student of Computer Science**

SKILLS

- JavaScript
- Node.js, Next.js, Express.js
- Data bases (MySQL, MongoDB, PostgreSQL, Firebase, Supabase)
- API Achitecture (monolit and microservices)
- OpenAI (Goodle Video AI) and Machine Learning
- Digital Ocean
- Cloud services (AWS, GCP and Azure)

LANGUAGES

- Ukrainian (Native) - C2
- English (Intermediate/ Upper Intermediate) B1/B2

YURII TSUDZENKO

NODE.JS DEVELOPER

PROFILE

I am an ambitious, stress-resistant, goal-oriented, ready for self-learning and development, open to communication person. I am ready to help others and hear advice from team members. I have a high computer science degree. I am able to think logically and solve problems. In addition, I have the ability to perform many tasks at the same time. I have a passion for clean code.

WORK EXPERIENCE

Insiders

Node.js back-end developer

2025 - TILL NOW

- Optimize sites using Next.js and PostgreSQL with Big Data with a large number of elements by creating indexes and optimizing procedures in databases
- Mobile application development using Rest with deployment on Digital Ocean using Bucket and Google video AI to create summary text from video and add Stripe to sites.
- Hosted the project on AWS using S3 bucket for data storage and route53 for domain name provisioning, cloudFront, Ec2 for server hosting and storing all data in supaBase. Configured automatic daily metrics collection

EPAM Campus (internal project)

2024 - 2025

Lead Data Quality Engineer

- Working with Azure, AWS and GCP cloud services and configure pipelines
- Implementing ETL process in Python and working with connections to different databases (MS SQL, PostgreSQL, Mongo DB)
- Ensuring data security using cloud services
- Working with a cluster on DataBriks, data visualization and creating a pipeline in PowerBI

DevPro

04.2023 - 12.2023

Node.js back-end developer

- Improve and develop the existing application by implementing new features like payment system and optimizations.
- Implement and integrate various innovative software solutions, including third-party applications.
- Conduct web scraping for over 10,000 unique items to support data-driven decision-making.
- Configure and manage CI/CD integration to automate deployment processes.
- Containerize the application using Docker for improved scalability and maintainability.
- Perform end-to-end testing using cloud platforms to ensure reliability and efficiency.

Sure Lock & Key company

2021 - 2022

Node.js back-end developer

- Improve and develop an existing application by implementing new features
- Containerize the application using Docker for improved scalability and maintainability.
- Provide authorization and authentication using JWT, Access and Refresh tokens with confirmation to the mailbox.
- Connect and configure AWS S3 for storing photos.
- Develop the UI interface using the React library.

University internal projects (Node.js,

09.2021-till now

Data Quality Engineering)

ACHIVEMENTS

Speaker in DES 2022, DES-2023, DES-2024, DES-2025 (Winter School in LNU)

Speaker in AIS-2024, AIS-2025 (Summer School in LNU)

Internal courses in EPAM (Database in Core, Data Quality Engineering, Testing fundamentals)
